

## SHORT COMMUNICATION

## Updates to Western Australia's vascular plant census for 2016

The census database at the Western Australian Herbarium (PERTH), which provides the nomenclature for the website *FloraBase* (Western Australian Herbarium 1998–), lists current names and recent synonymy for Western Australia's native and naturalised vascular plants, as well as algae, bryophytes, lichens, slime moulds and some fungi. The names represented in the census are either sourced from published research or denote as yet unpublished names based on herbarium voucher specimens. We herein summarise the changes made to vascular plant names in this database during 2016.

Eighty-six taxa were newly recorded for the State, of which 29 are naturalised and 25 have been added to the *Threatened and Priority Flora list for Western Australia* (Western Australian Herbarium 1998–) (Table 1). A total of 150 name changes were made (Table 2). Plant groups for which a number of name changes were made include *Malleostemon* J.W.Green, with the formal publication of numerous phrase names (Rye 2016), and *Logania* R.Br., with the transfer of many Western Australian species to the new genus *Orianthera* C.S.P.Foster & B.J.Conn (Foster *et al.* 2014). All taxa previously included under the genus *Keraudrenia* J.Gay have been transferred to *Seringia* J.Gay (Wilkins & Whitlock 2016). A number of changes were made in Restionaceae following publications in *Telopea* (Briggs 2014a, 2014b) that resulted in the sinking of several genera endemic to Western Australia: *Meeboldina* Suess. and *Stenotalis* B.G.Briggs & L.A.S.Johnson are now included in an enlarged *Leptocarpus* R.Br., and *Harperia* W.Fitzg., *Kulinia* B.G.Briggs & L.A.S.Johnson and *Onychosepalum* Steud. are now synonymised under *Desmocladius* Nees.

A single manuscript name was changed to a phrase name under Council of Heads of Australasian Herbaria (CHAH) guidelines for informal names (Barker 2005), while 14 manuscript names and 19 phrase names were formally published (Table 2). Table 2 also includes cases where there has been a change of taxonomic concept, misapplication, exclusion or rank change.

**Table 1.** New records added to Western Australia's vascular plant census during 2016. *in litt.* = in correspondence; *in sched.* = on herbarium sheet/label; \* = naturalised; T, P1–P4 = Department of Parks and Wildlife Conservation Codes for Western Australian flora (Jones 2015; Western Australian Herbarium 1998–).
